47 Magno-Mud Cure.
48 Dennis Fluorometer.
49 Imperial Granum.
50 Phenique Chemical Co.
51 L. E. Knott App. Co., X-Rays.
52 Postum Cereal Co.
53 Denver & Rio Grande R. R.
54 Rock Island R. R.
55 Santa Fe R. R.
56 C. H. Hanson, Engraver.
57 Hydroline.
58 B. B. Water.
59 St. Louis Physicians' Supply Co.

CONTENTS OF VOL. III.

SUBJECTS, JULY, 1898.

No. Page.
1 Radiance Approaching the Maximum: Its Production and Uses 315
2 Traumatic Neurasthenia 318
3 Regenerating X-Ray Tubes 319
4 Practical X Radiance: Distance and Period of Exposure 320
5 Anode Rays 331
6 X-Rays 331
7 Cathode Rays in an Oscillating Electric Field; Influence of Displacement Currents, Electrostatic Charges on the Walls of the Vacuum Tube; Influence of the Cathode Phenomena Called into Existence by the Oscillating Electric Field 331
8 X-Rays in the Army 337
9 Recent Advances in the Treatment of Fractures of the Extremities.....338
10 Visibility of the Roentgen Ray.....338
11 Roentgen Society, of London—Committee of Inquiry into the Alleged Injurious Effects of X-Rays 339
12 Roentgen Society Proceedings 340
13 Use of X-Rays in Locating Bullets....341
14 Supracondylar Fractures 341
15 Photometer and Skiagraphy 342
16 Broken Neck 342
17 Discharge by X-Rays 342
18 Curative Properties of the X-Rays..342
19 Cataphoresis 343
20 Value of the X-Rays in Medicine.....344
21 Overcoming High Resistance in Crookes' Tubes 344
22 Localization of Foreign Bodies in the Eye 345
23 Roentgen Rays in Warfare 346
24 X-Ray Cinematagraph 347
25 Fluorescent Screen 347

ILLUSTRATIONS.

1 Bullet in Shoulder 320
2 Fracture of Neck of Femur 321
3 Watch in Stomach of Man, Showing Chain from Mouth 322
4 Deformity of Left Foot, Right Normal 323
5 Aneurism of Arch of Aorta 324
6 Needle in Hand 325
7 Dislocated Radius and Shattered Ulna 326
8 Dislocated Femur with Partial Loss.327
9 Bullet in Head 328
10 Non-Union of Ulna—Union of Radius.329
11 Bullet in Head Behind the Eye.....330
12 Ostrich-Man Stomach, Containing 16 Different Metals 330
13 Special Vacuum Tube 332
14 Comet Tail Appearance 333
15 Solenoid 333

SUBJECTS, AUGUST, 1898.

1 X-Rays and Electro-Therapeutics in London (continued) 349
2 Visibility of X-Rays 353
3 Bullets in the Brain and the Roentgen Rays 354
4 Properties of the Becquerel Rays 354
5 X-Ray Diagnosis in Children 357
6 Examination of Coal by the X-Rays. .364
7 Rotation of Cathode Rays 364
8 On the Source of the Roentgen Rays in Focus Tubes 365
9 Roentgen Rays in War Surgery.....368
10 Action of the Roentgen Rays on the Growth and Activity of Bacteria and Micro-Organism 369
11 How Best to Secure Exact X-Ray Indications 371
12 A Theory in Reference to the Origin and Character of X-Rays 371
13 Calorific Action of Roentgen Rays....372
14 On the Visibility of the Roentgen Rays 375
15 Cathode Rays 374
16 Immersed Luminous Electrodes 374
17 Colles' Fracture and the Roentgen Rays 375
18 Sonnet to the X-Rays 377
19 The X-Rays and Their Safe Application: X-Ray Sterilization 377

ILLUSTRATIONS.

1 Gunshot Fracture of Humerus 356
2 Compound Fracture of Legs, Both Bones in Plaster of Paris 359
3 Pathological Dislocation of Hips 361
4 Bullet Near Fifth Dorsal Vertebra....361
5 Injected Fetus 363
6 Tuberculus Knee 363
7 Resection of Tuberculus Knee.....363
8 Fracture and Thickening Through Condyles of Humerus 364
9 Diseased Hand 364
10 Camera for Studying X Radiations...365
11 Special Tube 365

7 Resection of Tuberculus Knee.....363
8 Fracture and Thickening Through Condyles of Humerus 364
9 Diseased Hand 364
10 Camera for Studying X Radiations...365
11 Special Tube 365

SUBJECTS, SEPTEMBER, 1898.

No. Page.

1 X-Ray and Electro-Therapeutics in London (concluded) 383
2 Injurious Effect of the Roentgen Rays: Treatment of X-Ray Injuries, Cause and How to Avoid Danger..386
3 X-Ray and Lupus 387
4 The Cause of the Effects Produced by Exposure to the Roentgen Rays....388
5 Theory of the Roentgen Rays 396
6 Optical Illusion 396
7 Cathode and Roentgen Ray Tubes....396
8 Treatment of Lupus with Roentgen Rays and Concentrated Light 396
9 Roentgen Light Notes—On Having The Target Separated from the Anode and Nearer the Cathode; on the Size of Cathodes; Perforated Cathodes; on the Fallacy of Using the Equivalent Air Spark as a Measure of the Degree of Vacuum in a Roentgen Light Tube; Diagnosis for Roentgen Light Tubes; Cooling the Target with Metal Vanes 397
10 X-Ray Gift 401
11 London Items—Roentgen Ray Printing; the X-Ray Block Printing by Means of the X-Ray; Purpose of the Invention; What Means Does the Process Employ? The Ray-proof Ink, the Ray-proof Dust, the Type Screen. The Various Operations. Optional Use of Writing Machines. Sheets Impressed both Sides. Fixing and Rinsing. Printing in Black on White Ground. X-Ray proofs. Impervious Powder. Printing on Large-sized sheets. Correcting Proof. Making up and Paging. A Curious Cryptographial Appliance. Rays and Vegetable Life. X-Rays Through Glow Lamp 402
12 Becquerel's Dark Light 410
13 Roentgen Light Notes 411
14 Roentgen Ray 411

ILLUSTRATIONS.

1 A. W. L. Roentgen Light Tube 398
2 Aluminum Cell and Window Platinum Target 399
3 Aluminum Covered Tube 399
4 Adjustable Tube Holder with Glass Diaphragm 400
5 Section of Tube Holder 401
6 Position 401
7 Reversed Position 401

SUBJECTS, OCTOBER, 1898.

1 Localization and the X-Rays 417
2 Lupus Treated by the X-Rays.....423
3 British Association for the Advancement of Science 424
4 Atmospheric Discharges 424
5 Discharge by X-Rays 434
6 Experiments on the Application of the Roentgen Rays to the Study of Anatomy 435
7 New Radio-Active Substances 437
8 The X-Ray in Law 437
9 Arc Between Aluminum Electrodes...438
10 Surgery and the X-Ray—Tuberculosis of Great Trochanter. Amputation of Toes. Removal of Bullet. Laminectomy. Medio-Bilateral Lithotomy. Coritis 439
11 The Influence of the X-Ray Method of Diagnosis upon the Treatment of Fractures 440
12 Dark Cathode Space 440
13 London Items. The Roentgen Ray in the Photographic Skin Disease. Roentgen Rays in Soudan. Radiography and the Physiology of the Heart. Condenser for Induction Coils 441
14 The Value of the X-Ray in Military Practice 443
15 Material in Anode and Cathode Determines Tint in X-Rays 443
16 Evidence that Roentgen Rays are Ordinary Light 444
17 Properties of the Vapors from the Carbon Arc 444
18 Radiograph Tubes 444
19 The Fallacies of X-Ray Pictures 445
20 Removal of a Bullet from the Body Axis after Its Localization by Skiagraphy 445
21 Western Surgical and Gynecological Association 446
22 Colored Photographs by Actinic Electricity 446
23 Lupus Treated by Roentgen Rays....446
24 Cathode Rays 446
25 Radiographs of Encapsulated Trichina 446
26 Cathode Rays, Academy Paper 446
27 Individual Identification Shown by X-Rays 447
28 Acute Inflammation of Prostate Gland 448
29 Curious Reversed Action in a Tube...448
30 Radiography in Coxalgia, Especially Its Beginning 449
31 Fluoroscope vs. Probe 449
32 Air Under Powerful Electric Stress..449
33 Osteitic Area Shown by Radiography.450
34 Radiography in Dental Surgery 450

ILLUSTRATIONS.

1 Diagram of Intersecting Rays 419
2 Localization, Third Method 420
3 Diagram, Practical Application 422

SUBJECTS, NOVEMBER, 1898.

1 Roentgen Ray Burns 451
2 Roentgen Ray Dermatitis 453
3 Cathode Rays in Current Paths 456
4 Roentgen Rays 456
5 A Reversing Switch for Static Machines 457

No. Page.
6 Crookes' Cross 457
7 The Dynamotor. The Dynamo, Armature, Commutator, Brushes. Series Wound, Shunt Wound, Compound Wound. A Field of Electrical Force, Electric Motor. The Dynamotor vs. the Induction Coil. Utility of the Dynamotor, Advantages of the Dynometer. How to Determine the Polarity 458
8 Cathode Rays 463
9 Structure of Cathode Light 463
10 Methods of Precision in Locating Foreign Bodies in the Head by Means of the Roentgen Rays, with Special Reference to Foreign Bodies in the Eye 464
11 Roentgen Rays in the Diagnosis of Pulmonary Tuberculosis 468
12 Bi-Polar Discharge 470
13 Cathode Rays 471
14 Mutual Repulsion of Cathode Rays...471
15 Fluorescence and Roentgen Rays.....471

ILLUSTRATIONS.

1 Reversing Switch for Static Machines 457
2 Dynamotor, Low Voltage and Low Frequency, Alternating Secondary.459
3 Dynamotor 460
4 Electrically Driven Telegraph Plant..461
5 Dynamotors in Same 462
6 Diagram for Localization 466
7 Localization Card Board 467

SUBJECTS, DECEMBER, 1898.

1 Fluoroscope vs. Uncovered Screens...473
2 Roentgen's Move to Leipsic 474
3 X-Ray Apparatus for Military Posts.474
4 Skiagraphy and the Circulation.....475
5 The Magnetic Deflection of Diffusely Reflected Cathode Rays 485
6 London Items—The Roentgen Rays in Italy. Improvement over Exposed Plates. X-Ray Printing 487
7 Photographic Effects Produced by Bacteria 488
8 The Harbeian Oration on the Influence of Character in Medicine.....489
9 Speculation Concerning the Roentgen Rays 489
10 Deflection of Cathode Rays 490
11 Roentgen Rays in Medical Work 490

ILLUSTRATIONS.

1 Tube Holder and Diaphragm 474
2 Cross-Section of Same 474
3 Chinese Vermillion, Scalpel, Silver quarter and ebony 475
4 X-Ray Apparatus, Fluorometer, Tube and Cadavera 476
5 Hand Normal and Injected, Showing Arteries 477
6 Injected Arteries 478
7 Tortuosity of Arteries in Old Hand of Woman 479
8 Arteries Injected in Foot 480
9 Foot Normal and Injected 481
10 Wrist Injected 482
11 Amputated Stump Showing Arteries.482
12 Injected Arteries About Elbow 483
13 Injected Thorax and Neck 484
14 Injected Thorax, Showing Supernumerary Arteries 485
15 Injected Pelvis 486
